Amenable to onsite work in Cebu office locations

PROFESSIONAL SUMMARY

Computer Science graduate (Major in AI, Web & Mobile Application Development) with hands-on experience in application development, full-stack engineering, and QA. Delivered software solutions end-to-end — from requirements analysis and design to implementation, testing, and deployment — across enterprise, government, and research settings. Skilled in Java, C, C++, Python, and SQL, with experience configuring systems to client business requirements and producing technical documentation. Hackathon award winner with agile delivery and stakeholder engagement experience.

EXPERIENCE

Freelance Developer — Project-Based (Remote)

Feb 2026 – Present

- Delivered HubSpot CRM data management, reporting, and workflow automation for a US-based diagnostics company, including contact–company address-sync workflows and an activity reporting dashboard
- Built Python tools for duplicate contact tracing and lead source tagging by processing exported CRM datasets

Software Engineering Intern (TEEP International Research Program) — K Laboratory, Southern Taiwan University of Science and Technology, Tainan, Taiwan

Oct 2025 – Mar 2026

- Developed and maintained an AI-powered dietary monitoring application end-to-end (Django backend, ML pipeline, database design), translating research and stakeholder requirements into system features
- Analyzed requirements with lab supervisors and configured system behavior against Taiwan HPA regulatory dietary standards
- Produced technical documentation, progress reports, and system specifications across a 26-week delivery cycle
- Monitored system performance and implemented enhancements based on testing and evaluation feedback

Software Developer Intern — Concreat

Jan 2025 – Jun 2025

- Developed a rewards and loyalty program web application, implementing features based on defined business requirements
- Built a store geolocator for partnered stores, integrating geolocation and mapping features into the platform

QA Engineer Intern — Raykan Technologies

Feb 2024 – Jun 2024

- Developed and maintained Cypress end-to-end test suites, improving reliability of web application releases
- Contributed to agile sprints, code reviews, and continuous integration processes while increasing test coverage of critical features

Lead Integrator / Programmer — Cylix Technologies

Jan 2022 – Mar 2022

- Led development and configuration of an automation system for One-Stop-Shop services across two city LGUs (Naga and Carcar), translating government business processes into system workflows
- Conducted system implementation, user acceptance support, and end-user training for government personnel
- Documented processes and digitized city records, improving retrieval time and document management efficiency

PROJECTS

SpoonFull — AI Dietary Monitoring System (2nd Place, DSP Contest, Taiwan Ministry of Education)

- Built food recognition and nutrition analysis pipeline (Python, computer vision, recommendation engine) for long-term care facilities, integrated with a Django web application

RCL Egg Trading Platform — Business Management System (Portfolio Project)

- Developed a six-module full-stack platform (React, Vite, Supabase/PostgreSQL) with role-based access control, covering inventory, BIR-compliant sales invoicing, logistics, HR/payroll with PH statutory deductions, and accounting

Paagi — AI Packaging Optimization System (1st Place of 38 teams)

- Designed dynamic box-sizing algorithms to reduce logistics waste; presented solution to Gothong Southern executives

EDUCATION

University of San Jose-Recoletos — Cebu City

June 2026

Bachelor of Science in Computer Science, Major in AI, Web & Mobile Application Development

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Python, SQL, JavaScript, TypeScript, PHP, Dart

Databases: PostgreSQL (Supabase), MySQL

Frameworks & Tools: Django, React, Angular, Flutter, Ionic, Laravel, REST APIs, Git, Cypress (E2E Testing)

Practices: Agile/Scrum, SDLC, Requirements Analysis, Technical Documentation, User Acceptance Testing

AI / Machine Learning: Computer Vision, Natural Language Processing, Model Deployment, Data Pipeline Design

LEADERSHIP & ACTIVITIES

USJ-R Information and Computer Technology Organization — VP for Education & Auditor

Aug 2021 – May 2022

Led academic mentoring programs and technical workshops, improving course pass rates
